SUSIE STANLEY
UI/UX FRONT-END DEVELOPER

ABOUT

I have always been curious about figuring out how things work and enjoy applying that knowledge to finding outside-the-box solutions. When I officially started school after years of being self-taught, I knew this was the perfect industry for me. I found that my communication skills, natural drive to solve problems, personal development training, and insatiable hunger for growing my knowledge base is a perfect fit for the tech world. Learning to code has been incredibly fulfilling and allows me to channel my curiosity, attention to detail, and creativity all into one outlet. I'm excited to continue learning and deepen my understanding of both programming and designing.

PROJECTS

RV There Yet? - *View Code*

This app is for travelers planning a trip somewhere between Nashville and a National Park. The app allows user to plan a road trip that provides park, event, trip, and weather info and includes directions from your current location

- App has full CRUD capability (React, API fetch calls, React-Routing, and JSON server)
- Styling was achieved through custom CSS to enhance the user experience

Life Hacker - *View Code*

- My front-end capstone app has full CRUD capability (React, local API fetch calls, React-Routing, React-to-Print, Cloudinary and JSON server) and centers around the users contacts, todo list, sticky notes, activities, grocery list, recommendations, journal entries, and wishlist. Life Hacker offers the user the ability to upload photos to their contacts and user profile.
- Styling was achieved through CSS, and Material Design Interface for a consistent user experience

SKILLS

- HTML
- CSS
- Javascript
- Git/GitHub
- React
- Figma
- Canva
- Material UI
- Photoshop Elements
- SASS/SCSS
- Bootstrap/Reactstrap
- JSON Server/API

TECHNICAL EXPERIENCE

SOFTWARE DEVELOPER

Nashville Software School | August 2021 to present

NSS is a six-month intensive, full-time software development bootcamp focusing on HTML, CSS, Javascript, & React with a specialization in UX/UI.

- Single-page application development with React and a focus on a modern ES6+ Javascript features and modular code
- Project management with issue tickets and GitHub Projects
- Database planning by building entity relationship diagrams (ERD) to define relationships with an emphasis on maintaining a flat data structure
- Utilized vanilla JavaScript (ES6), and React.js to create single & multi-page dynamic web applications using full CRUD functionality
- Styled applications using CSS/SASS/SCSS, Bootstrap, Reactstrap, and Material UI
- Completed 6 solo projects and 6 group project sprints while fully remote, comfortable with Slack, Zoom, GitHub Project, Figma and wireframes/prototypes for group communication and collaboration.

PROFESSIONAL EXPERIENCE

REAL ESTATE AGENT

Keller Williams Realty | 2015 - 2021

- Assisted clients with selling/buying residential property
- Advised clients regarding contracts, inspections, loans, writing offers, & keeping legal deadlines
- Created digital marketing products for homes
- Attention to detail, effective communication and interpersonal skills during times of high stress
